

Cybersecurity Check-up with Primend

Simplify Cybersecurity Awareness for Your Organization.

Primend offers a web-based training platform designed to change user behavior, increase security awareness, and strengthen overall IT security across the organization.

Who is it for?

Cybersecurity Check-up with Primend is tailored for companies that want to provide their employees with continuous training to recognize and prevent cybersecurity risks.

The process

- **Micro-training modules:** Short, engaging, and easy-to-digest learning content.
- **Simulated attacks:** Realistic tests to measure users' likelihood of clicking malicious links or sharing sensitive data.
- **Behavior-first design:** Keeps users engaged and continuously improving.

How it works?

- **Set & Forget:** Easy first setup, fully automated with ongoing integrations.
- **Cutting-edge content:** Always updated to match the latest threat landscape.
- **Adaptive solution:** Tailors content by user, department, region, and language (30+ including all 3 Baltic languages).
- **Reporting:** Full insight into both individual and collective awareness levels and results.
- **High engagement:** Designed to drive behavior change, not just knowledge.

Benefits

- Comply with NIS2, DORA and GDPR regulations
- Keep your organization vigilant and resilient
- Minimize effort, maximize results with automation

Pricing*

1,60 € / user / month
