Primend Office Solution

Thanks to cloud technology, using of IT services is simple, convenient and safe.

New tools ensure data access from anywhere and any equipment, and if anything should happen to the workstation, all the data is securely preserved in the cloud.

Why, Primend Office Solution?

No server at the office or Primend Cloud is required

- It is no longer necessary to maintain or purchase server hardware
- Individual server licenses are no longer required, all are covered by the Microsoft 365 package
- It is no longer necessary to perform regular updates; those are performed by the service provider at the background
- A backup device, software, monitoring or checking are no longer required

Simplifies building of a network at the client's locations, regular Internet is enough

The user has access from anywhere via own device and account, without VPN means

The computer shall always have the latest version of Windows 10 operation system, including security updates and virus protection

A possibility for immediate implementation of various cloud services of Microsoft

- Office 365, Exchange Online, SharePoint Online, OneDrive for Business, Microsoft Teams

A possibility to use several security measures

- **MFA** – Multi Factor Authentication enabling access to the services of Office 365 also outside the internal network of the company
- **ATP** – a check of e-mail attachments and links in order to avoid viruses and leaking of passwords
- **DLP** – blocks leaking of personal and credit card information by e-mail
- **MDM** – information about smart devices visible in Office 365 environment, provides a possibility to switch on password requirement and delete the memory of a phone in the event of theft or loss
- **PIN for smart devices** – provides a possibility to switch on basic PIN prompt on a smart device if the user uses the business applications and information of the company through a smart device

Even though less is more, we are not forgetting safety.

The solution provides your employees with the latest tools and various possibilities of shared work.
